

Wallchart Handout

Introduction

The purpose of this document is to outline the general process of generating a large wall size family history fan chart.

Websites

1. Family Search for the tree: www.familysearch.org
2. Genealogy Wall Charts: www.genealogywallcharts.com

Process

1. Create a tree on Family Search (if you do not have one there already). The site is free and all you need to do is register to get started. The tree does not need to be extensive. For the wall chart, suggest you only include maternal and paternal lines with names, birth dates and death dates to start.
2. Capture your own index number as the tree ID
3. Logon to Genealogy Wall Charts
4. Select the type of tree you wish
5. Link to your tree (or, you can load a Gedcom file)
6. Select the various chart options you wish to choose.
7. Place you order.

Results

Typically the process takes only a few minute to complete an order. Delivery time is usually a week or so in continental USA.
